## SurGuard™ 2

### The convenient way to prevent needle stick injuries

- Easy-to-learn One-Hand-Activation<sup>1</sup>
- Visual, audible and tactile confirmation<sup>1</sup>
- Full advantage of Terumo's T-SHARP™ Needle Technology<sup>2</sup>
- EN ISO 23908 compliant

With the development of the SurGuard™2 shield and the full integration of Terumo's outstanding experience in cannulas for hypodermic injections, we offer a convenient solution to enable a safe work environment:

- Limited training demand thanks to the intuitive design and user experience-supported Instructions for Use.<sup>1</sup>
- Applicable for all major injection techniques: subcutaneous, intramuscular and intravenous (at various angles).
- User confidence is well supported by the provision of visual, audible and tactile feedback on successful activation.<sup>1</sup>
- Sheath position pre- and post-injection can be chosen according to the user's preference, allowing an unimpaired view of the puncture point and requiring little interaction to activate the safety feature.
- All the advantages of Terumo's T-SHARP™ needle technology further contribute to user and patient comfort: low penetration and almost linear drag forces (virtually no knocking effect), with the aim of reducing pain as much as possible.<sup>2</sup>
- Well-balanced range of diameters and lengths to allow selection of the most suitable specification for any drug-application combination.

Our long presence in numerous markets and the increasing demand in occupational health support have led to a broad global registration coverage – and our teams are ready to extend it for you!
