

Quality time for better care

PHARMACEUTICAL

PLAJEX™

Ready-to-Fill Polymer Syringe with Staked Needle

Designed to meet the needs
of a variety of drug types

PLAJEX™ is designed to meet the needs of a wide variety of drug types, including those requiring lower interaction with containers.

PLAJEX™ integrates a staked needle with a robust 1 ml long silicone oil-free polymer syringe. This solution comes nested and sterilized, ready for filling and finishing. Offering excellent strength and clarity, and Terumo's proprietary i-coating™ technology on the plunger stopper, the silicone oil-free syringe system is designed to preserve sensitive biotherapeutics¹

PLAJEX™ offers the quality and supply reliability needed to meet parenteral delivery challenges and product commercialization goals

- Ready-to-fill format
- Silicone oil-free
- Tungsten-free
- Adhesive-free
- Higher resistance to breakage
- Autoclave advantage

i-coating™

- Terumo's proprietary i-coating™ is applied to the surface of the stopper and bonded to the substrate. It is not a laminate and it remains flexible with the substrate.
- Provides a silicone oil-free container for drug products requiring lower interaction with containers.
- This thin surface coating provides consistent and predictable gliding force for the syringe producing a silicone oil-free solution.
