

Quality time for better care

PHARMACEUTICAL

Your Integrated CDMO Partner for Parenteral Drug Products

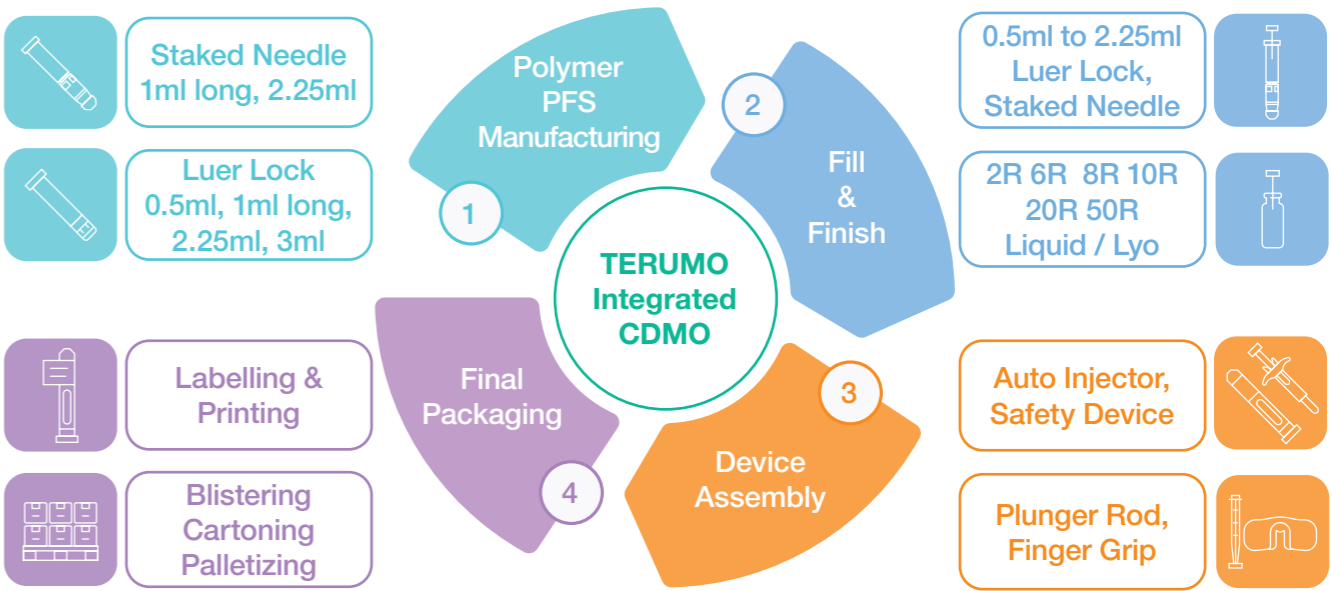

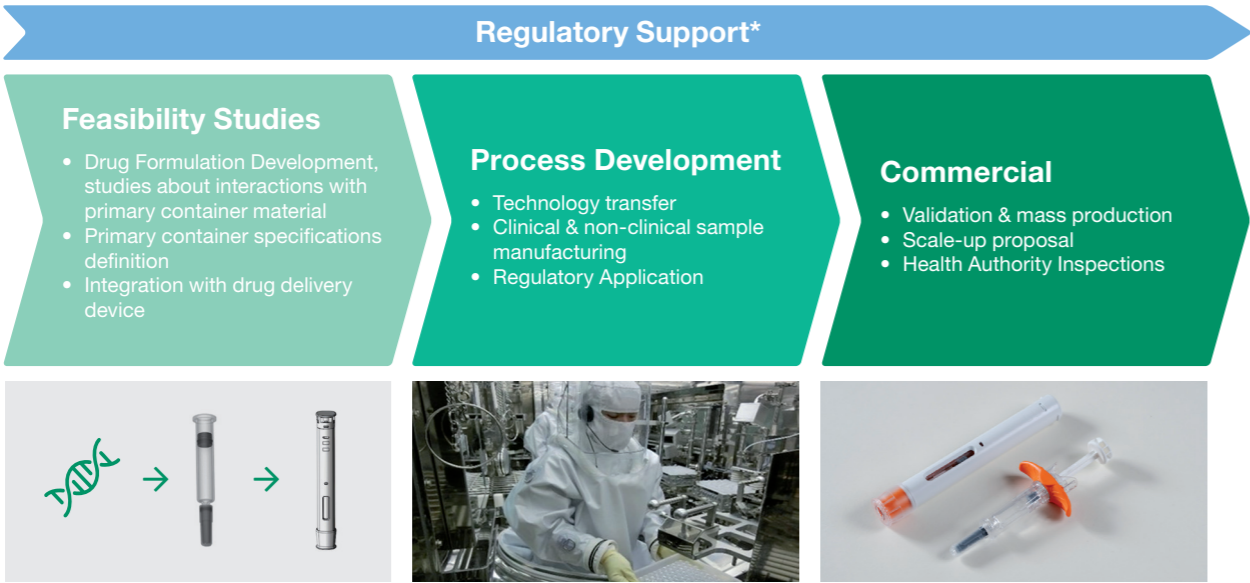

Let's find your best solution

We provide sterile injectable contract development and manufacturing (CDMO) services from initial combination device design and formulation development to commercial manufacturing.

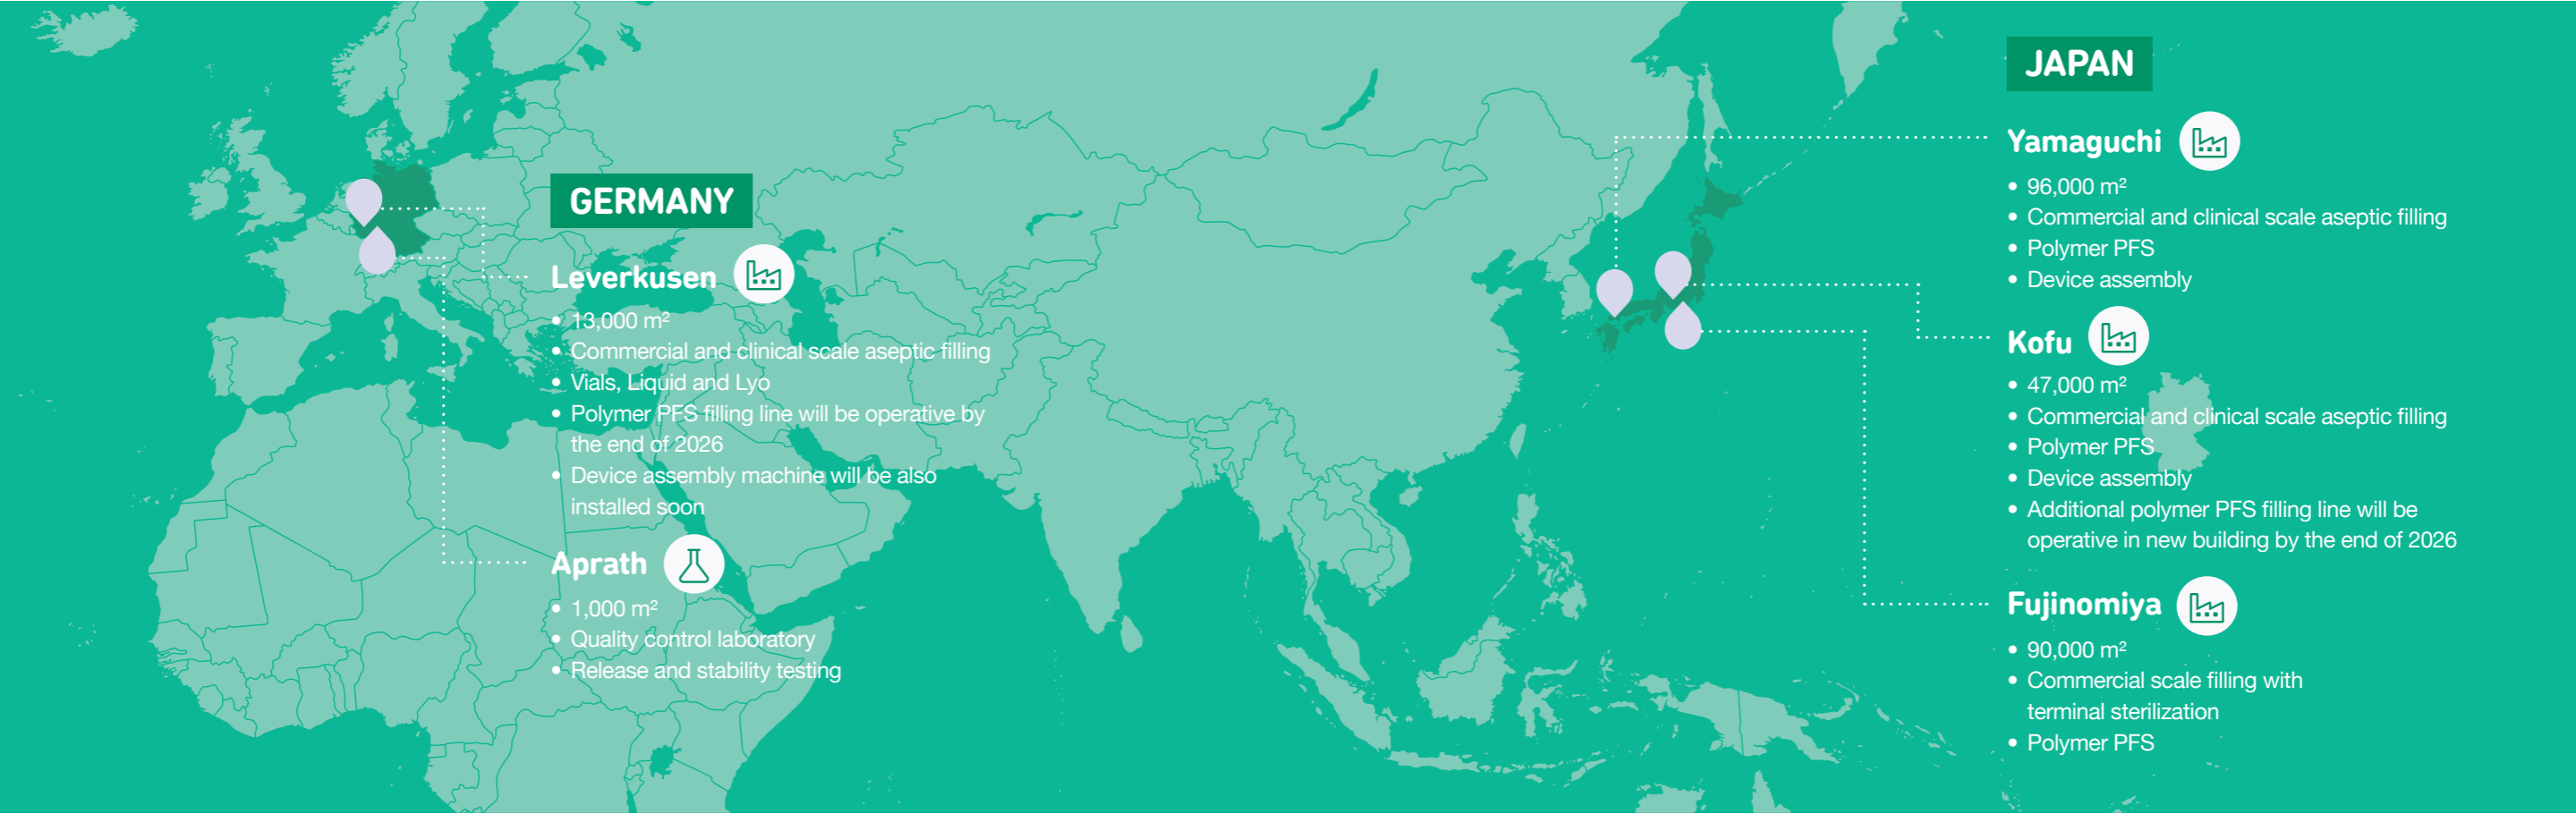

Access world-class CDMO capabilities

We provide sterile injectable CDMO from clinical to commercial scale. Leveraging 100 years of experience in medical device field, our integrated services include combination product design, formulation development, aseptic fill & finish, device assembly and packaging.

Supporting better patient experiences around the world

We've significantly boosted our production capabilities, seamlessly spanning multiple state-of-the-art facilities across Japan and Europe. Our facilities are cGMP compliant, certified* by regulatory authorities including the PMDA, FDA, EMA.

*For more information about regulatory status and support for each plant, please contact Terumo

Quality Assurance...

- Encompasses the different stages of the integrated manufacturing flow

More than 20 years of...

- Mass production and supply
- Global launches
- Multiple secondary devices

Simple supply chain

- Bring your Drug Substances
- Terumo provides a final commercial product

Skilled team with different expertises

- Formulation
- Polymer PFS design, manufacturing
- Device integration
- Filling process
- Regulatory support

Providing total support...

- From early development drug phase to regulatory application

For more information

Offering world-class solutions for parenteral drugs

- Exclusive access to an advanced integrated portfolio of combination parenteral drug delivery technologies
- A device engineering team that specializes in understanding challenges and resolving issues related to matching large and small molecule formulations of varying viscosity to primary container, device, process and patient
- A formulation team experienced in parenteral drug formulation development, technology transfer and regulatory filing
- Sterile aseptic capabilities for multiple container types enable Terumo to support pharmaceutical companies from early drug development, starting clinical trials with vials and then transitioning to pre-filled syringes at regulatory registration
- A strategically located development and manufacturing partner with the regulatory experience to help launch products in markets all over the world faster and more successfully
